COORDINATION CHEMISTRY REVIEWS VOLUME 123, NUMBERS 1–2, FEBRUARY 1993

Contents

The relation between ligand structures, coordination stereo-chemistry, and electronic and thermodynamic properties
P. Comba (Basel, Switzerland) 1

Thiosemicarbazone complexes of copper(II): structural and biological studies
D.X. West, A.E. Liberta (Normal, IL, USA), S.B. Padhye, R.C. Chikate, P.B. Sonawane, A.S. Kumbhar and R.G. Yerande (Pune, (India) 49

Syntheses of sulphur-bridged molybdenum and tungsten coordination compounds
T. Shibahara (Okayama, Japan) 73

A group theoretical analysis on transition-metal complexes with metal–ligand multiple bonds
Z. Lin and M.B. Hall (College Station, TX, USA) 149

Non-aqueous, outer-sphere electron transfer kinetics of transition metal complexes
S. Wherland (Pullman, WA, USA) 169

Luminescent lanthanide complexes as photochemical supramolecular devices
N. Sabbatini, M. Guardigli (Bologna, Italy) and J.-M. Lehn (Strasbourg, France) 201

Poly(ethylenimines) as Brønsted bases and as ligands for metal ions
A. von Zelewsky, L. Barbosa and C.W. Schläpfer (Fribourg, Switzerland) 229
